

PRESS RELEASE

Paris on March 3, 2022.

MoZaiC Asset Management will lead the Health Think Tank at the MIPIM 2022!

- **MoZaiC Asset Management**, in the person of its founder, Frédéric DIB, will lead the **Health Think Tank** on **Wednesday 16 March from 11am to 12.30pm**.
- The star event of the real estate sector, entitled for this edition "Driving Urban Change" will be held from March 15 to 18.

Frédéric DIB will have the honor of leading the **Health Think Tank** dedicated to the construction of resilient and sustainable cities. This event will attempt to respond to two of today's societal, economic and environmental challenges:

- What are the initiatives here to boost a shift towards climate-neutral cities?
- What are the post covid prospects to ensure quality of life & healthy lives for citizens?

Several roundtables, moderated by **industry experts**, will be organized to discuss these issues:

- Healthcare Real Estate future: The crises related to COVID-19 and the consequences of the Orpéa crise, in France, will have an impact on healthcare real estate with obvious repercussions for leasing as well as mergers and acquisitions. What new trends are emerging, particularly in the nursing homes sector?
Table leader: Frederic Dib, Founder and CEO, MoZaiC Asset Management
- Adaptive healthcare design: The COVID-19 has shown the value of effective preventative measures in healthcare facilities. How can the industry adapt to future crisis and ensure that systems are resilient?
Table leader: Magnus NICKL, European Network Architecture for Health (ENAH), Germany
- Net zero healthcare: Healthcare accounts for about 1% to 5% of the total global impact (greenhouse gases, nitrogen, scarce water use, particulate matter, Nitrogen oxide -NOx and Sulfure dioxide -SO2). How can the sector make the transition to carbon-neutral systems?
Table leader: Edith BLENNERHASSETT Director, ARUP, UK

- Inclusive habitat: Cities sit at the centre of modern life and have the potential and resources to provide positive benefits to people of all ages. However, not all city inhabitants benefit from these services or have equal access to housing, such as seniors. What are the alternatives for them?

Table leader: Frédéric DUROUSSEAU, Chief Real Estate and Development Officer, KORIAN, France

- Well-being in building: How can real estate increase community quality of life, health, and well-being? What are the general trends, as well as those in the healthcare industry?

Table leader: Richard Le SUEUR, Director, EMEA Region, Senior Director at International WELL Building Institute (IWBI), UK
